REVAMP YOUR HOME WITH RUBADEC

THE FACTS

Rubadec is anti-fungal, anti-bacterial, UV resistant and slip resistant when wet.

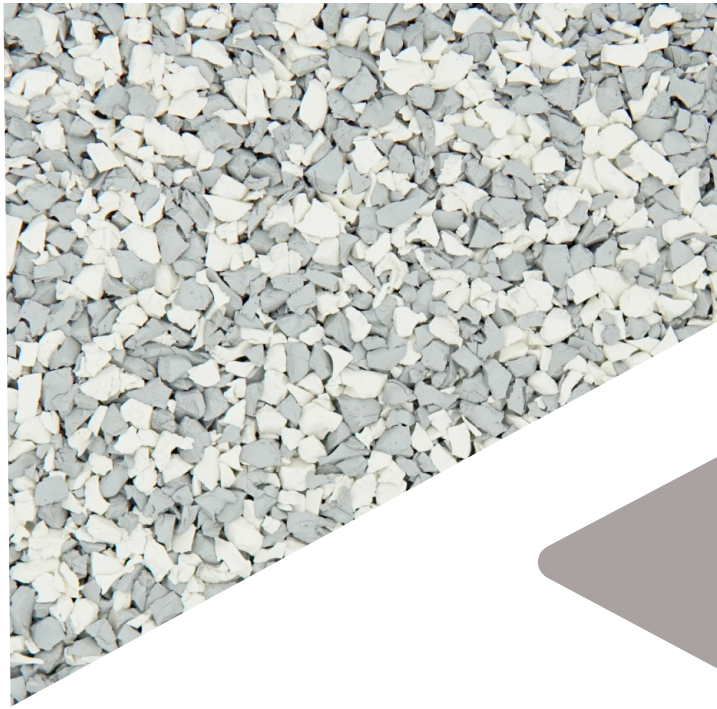
Our surfaces will not crack under extreme temperatures and accommodates to ground movement. Rubadec adheres directly to any solid-substrate materials including old or new concrete, asphalt, epoxy, stone, brick, steel, tarmac, chipboard, and aluminium.

Rubadec surfacing has been designed and thoroughly tested to remain stable in all weather conditions.

WHAT MAKES US UNIQUE

With endless colour combinations the design capabilities of Rubadec surfacing are limited only by your imagination!

- RESILIENT AND DURABLE
- MINIMAL INSTAL TIME
- COOLER THAN CONCRETE
- SLIP RESISTANT

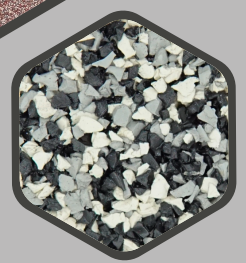


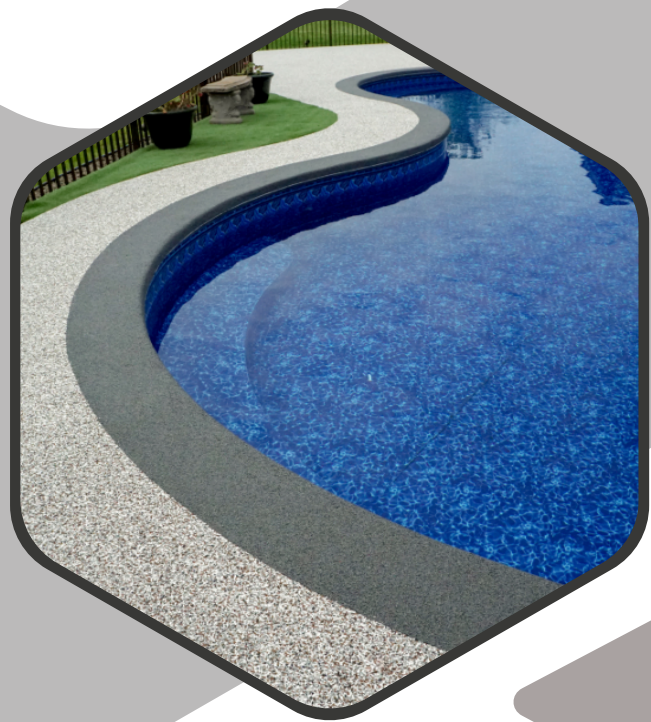
TRANSFORM YOUR SPACE

Rubadec is mixed on site and troweled by craftsmen to a uniform thickness over your new or existing surface to create a beautiful, seamless finish. Special rubber safety surfacing materials are skilfully used for custom logos and designs. Rubaroc can also be applied to angular surfaces, like coping around a pool or stair faces.

Rubadec has been installed in a wide variety of residential environments. We create beautiful surfaces for pool decks, driveways, garages, patios, and porches, while retaining all the safety properties Rubber surfacing has to offer. Style, comfort and safety - Rubadec has it all.

Rubadec surfaces are created using polyurethane binders and high-quality coloured rubber granules. A process which has been developed over the years to create the most resilient, non-skid surface that is virtually indestructible.





THE ORIGINAL

Rubadec was founded by Barry Meakings Sr. His tenacious commitment to developing a safety base product has evolved the Rubadec formula into the high-quality safety surface that it is today.

Rubadec projects are installed fast and without the use of loud, bothersome machinery. The surface can be walked on in as little as 24 hours, ensuring minimal inconvenience.

Rubadec is unlike any other surface. It is long-lasting, easy to maintain, and you can expect an efficient and professional installation. Rubadec proves safety can be beautiful!
